Ruby on Rails, JavaScript, Java, HTML, CSS, PostgreSQL, MySQL, REST APIs, Git, Node.js, Bootstrap, RSpec, JUnit, Docker, Redis, SQL, Sidekiq, Heroku

EXPERIENCE

ApproveShield, Software Engineer

Richardson, TX | February 2024 - September 2025

- Developing a modernized analyst interface as a single-page Rails app aimed to eliminate tab-switching and improve daily productivity.
- Introduced an automated rental history verification system that increased analyst productivity, including third-party integration for address data normalization and validation.
- Overhauled company website and UI/UX to improve market positioning.
- Established on-call process to improve communication with leadership during emergencies.

GetWell, Senior Software Engineer

Remote Position | June 2022 - July 2023

- Built integration service connecting disparate company products using Ruby on Rails and React, including external API integrations and internal API development.
- Maintained legacy Java application for medical record imports, implementing bug fixes and unit tests.
- Resolved emergency tickets through on-call rotation and cross-functional collaboration.
- Improved team productivity through pair and mob programming practices.

ABCorp, Software Engineer

Plano, TX | April 2020 - June 2022

- Developed C# applications for credit card printer and PIN pad hardware integrations, including a critical touch screen kiosk project for Instant Issuance software.

Kibo Commerce, Software Engineer II

Dallas, TX | August 2016 - February 2020

- Developed Customer Care application front-end and Order Management System integrations using Java, including hardware integration with Zebra scanners.

EDUCATION

B.A. Computer Science, Southwestern University (2012-2016)

CERTIFICATIONS

Ruby Association Certified Ruby Developer (Silver), Ruby Association (2025)
